

# Astwood Signage Guide

The risk assessment\* requires the following signs:

- Warning signs placed near the start/finish points
- **One “Cycle Event in Progress” warning sign visible to westbound traffic on the A422 placed prior to the junction where riders join the A422**
- **One “Cycle Event in Progress” warning sign visible to eastbound traffic on N. Crawley Road just prior to the T-junction where riders join N. Crawley Road**

For two laps of the course, or when riders start near the BikeBus, an additional “Cycle Event in Progress” should be placed on Astwood High Street to the east of the T-junction and visible to traffic travelling west on the High Street.

\* The principles used for determining sign placement are as follows:

1. Signs to be placed near start/finish areas
2. Signs to be placed where riders join a major road from a minor road
3. Signs to be placed where motor traffic joins the course at roundabouts
